C. DUAL SERVICE

(N)

1. Dual Service is a service offering which allows calls to a telephone number to be sent simultaneously to two different addresses served from the same wire center. The provision of Dual Service assures the customer continual service at both locations during the time of a move and will be limited to a maximum of 30 days.
2. A request for Dual Service occurs on orders for a transfer of service within the same wire center where no telephone number change is involved. Dual Service will be offered subject to the availability of facilities and technical limitations. Dual Service will be available to subscribers of single line and multi-line residence service and simple non-residence service.
3. The following features are not compatible with Dual Service and will be temporarily unavailable at both locations until Dual Service is no longer subscribed.

Call Waiting Deluxe
Call Forwarding Busy Line
Call Forwarding Don't Answer
Repeat Dialing
Call Tracing
Caller ID
Calling Name and Number

4. Dual Service charges will include the nonrecurring charge following, in addition to the applicable portion of the monthly rate on both lines during the period of service overlap.

GG. MAKE BUSY OR BREAK HUNT

1. "Make busy" or "break hunt" are two methods of restricting traffic. With these arrangements, a key is provided at the customer's location which either makes certain lines busy or breaks the huntina from certain lines so that calls may be directed to a centralized point or to a specific line or lines. At least one line of a group of exchange service lines must be excluded from "make busy".
2. The features are provided only with individual line service, subject to the availability of facilities. The make busy or break hunt feature uses equipment arrangements in the central office as are considered standard by the Telephone Company.
3. A private line channel is required between the serving central office and the customer location for control. A closure on the control channel is required at the customer's control location to activate and deactivate the features. This closure is normally provided by an externally mounted locking type key (cut off key).
4. Provision of these features are based on the servina central office and the customer control location being in the same central office area. When the servina central office and the customer control location are not in the same central office area, charaes equivalent to the estimated cost to be incurred apply for any additional equipment or facilities required to provide the features.

5. The following rates and charges apply in addition to the rates and charges applicable to any other service or equipment:

MAY 23 1995
PURSUANT TO 807 KAR 5:011,
SECTION 9 (1)
BY: Gordon C. Neal
FOR THE PUBLIC SERVICE COMMISSION
USOC

	<u>Initial Charge</u>	<u>Monthly Rate</u>	<u>USOC</u>	
a. Make Busy (Note 1)				
First line	\$ 30.50	\$ 11.75	99N11	
Each additional line (Note 2)	2.50	4.55	99N12	(C)
b. Break Hunt (Note 1)				
First line	30.50	11.75	93B11	
Each additional line (Note 2)	2.50	4.55	93B12	(C)
c. (Reserved)				
d. For a change from "Make Busy" to "Break Hunt" or vice versa, or from one line equipped to another, the initial charge as specified above applies.				(C)

- NOTES: 1. Rates and charges for the Series 900, Type 901 channel between the serving central office and the customer control location are as specified in the Private Line Tariff PSCK No. 4. The Private Line Tariff will be **GRANDFATHERED** as of May 23, 1995, and withdrawn as of May 5, 1997 in accordance with Case No. 94-355, issued by the Public Service Commission of Kentucky. Customers with existing services will be able to maintain those services under the existing billing arrangement until May 5, 1997. New customers must **order** service out of PSCK Access Service Tariff. (C)
2. For subsequent installations, a \$20.00 minimum initial charge will apply for the first line of a group being added. (C)

NN. REMOTE CALL FORWARDING

1. General

Remote Call Forwarding (RCF) is a service whereby a call placed from a station (the originating station) to a customer's (the RCF customer) telephone number (the call forwarding location) is automatically forwarded by Telephone Company central office equipment to another station designated by the RCF customer (the terminating station) which is (1) interexchange, (2) Local Exchange Service, (3) 800 Service (Inward Wide Area Telecommunications Service), or (4) a Foreign Exchange Service (FX). Additionally, RCF may also be used with Foreign Exchange Service to forward calls via network facilities when the Foreign Exchange line is busy. This service is only available where the terminating station has incoming-call dial capability.

2. Limitations of the Service

- a. Remote Call Forwarding service is offered subject to availability of suitable facilities.
- b. RCF service is not offered where the terminating station is a coin telephone.
- c. The Telephone Company will not provide identification of the originating telephone number to the Remote Call Forwarding customer.
- d. Transmission characteristics may vary depending on the distance and routing necessary to complete the remotely forwarded call.
- e. Remote Call Forwarding is not represented as suitable for satisfactory transmission of data.
- f. Call Forwarding should not be offered as a feature at the RCF terminating station.
- g. Remote Call Forwarding is provided on the condition that the customer subscribe to sufficient RCF features and facilities to adequately handle calls to the RCF customer without interfering with or impairing any services offered by the Telephone Company. If in the opinion of the Telephone Company, additional Remote Call Forwarding features at the call forwarding location or facilities at the terminating station are needed, the customer will be required to subscribe for such additional RCF features and facilities. In the event the customer refuses to subscribe for such additional RCF features and facilities, said customer's RCF service shall be subject to termination.

NN. REMOTE CALL FORWARDING (Cont'd)

3. Rates

a. The rates and charges shown below are for the Remote Call Forwarding feature only and are in addition to applicable rates and charges for service and equipment with which it is used.

b. Remote Call Forwarding per feature arranged

<u>Initial Charge</u>	<u>Monthly Rate</u>
\$45.00	\$19.00

(I)

c. Message Charges

The message charges applicable to remotely forwarded calls shall be comprised of two separate charges; (i) a charge for that portion of the call from the originating station to the call forwarding location, and (ii) a charge for that portion of the call from the call forwarding location to the terminating station. The respective charge for each such portion shall be as follows:

(1) Between the originating station and call forwarding location.

The charge for this portion of a remotely forwarded call shall be the charge applicable for the type of call involved.

(2) Between the call forwarding location and the terminating station.

The Remote Call Forwarding customer is responsible for the applicable customer-dialed station-to-station toll charge. On local calls, the customer is responsible for the payment of a charge equivalent to the usage rates for originated customer dialed Optional Measured Service calls including any applicable discount as specified in Section 1 of the Exchange Rate Tariff. Usaa allowances are not applicable to RCF. The preceding charges apply to all calls answered at the terminating station including person-to-person and collect calls, even though such calls might not be accepted at the answering location.

WW. SELECTIVE CLASS OF CALL SCREENING SERVICE

1. General

- a. Selective Class of Call Screening Service enables a customer, by means of Telephone Company operator identification, to restrict outgoing toll calls from station users to only those calls which are charged to the called telephone number, a third number, or a Telephone Company call ino card account .
- b. All local calls and calls to Telephone Company numbers such as repair service, Directory Assistance Service, and public emergency service numbers, such as 911, will be permitted from the establishment.
- c. This service is available only to colleges or universities, hospitals, hotels, motels, and other such institutions, and is available only where facilities permit.

XX. BILLED NUMBER SCREENING SERVICE

(N)

1. GENERAL

Billed Number Screening Service is an incoming toll screening service available to subscribers of the Telephone Company's local exchange service. This service is intended to prevent the charging of collect, and/or third number billed (calls) to a customer's telephone number.

2. REGULATIONS

- a. To provide this service, the Telephone Company will place information required to utilize Billed Number Screening Service in the Line Information Data Base (LIDB) or other databases necessary to implement Billed Number Screening Service. In the event a call is placed and charged to a number which should have been prevented by Billed Number Screening, the Telephone Company will adjust the charge call or calls from the customer's bill and turn the information over to the carrier to determine and arrange for any further billing of such calls. The Telephone Company makes no guarantee and assumes no liability arising out of the use, lack of use or misuse of Billed Number Screening Service by Interexchange Carriers or any other entity. Bill Number Screening Service is not a central office service but rather a data-base service. It is only effective in combatting toll fraud when the Interexchange Carriers and/or Operator Service Providers access the database(s). The Telephone Company is fully responsible for calls charged to telephone numbers, which should have been prevented by Billed Number Screening Service, that originate and terminate within the Telephone Company's service territory, and are carried over no other carrier's networks or facilities.
- b. Billed Number Screening Service is offered subject to the availability of suitable facilities.
- c. The minimum service period for Billed Number Screening Service is one month.

YY. ORIGINATING LINE NUMBER SCREENING SERVICE

(N)

1. GENERAL

Originating Line Number Screening (OLN) is a two digit code passed by the Telephone Company's local central office switch with the Automatic Number Identification (ANI) at the beginning of a call that provides information about the line originating the call. The information provided in the two digit code is designed to inform the exchange or interexchange carrier and/or the operator service provider about certain service classes or special characteristics of the billing number associated with the line originating the call. Under this arrangement, operators should accept only those originating toll calls that are made collect, billed to a third number, or billed to a calling card.

2. REGULATIONS

- a. Originating Line Number Screening is offered subject to the availability of suitable facilities and equipment.
- b. The minimum service period for Originating Line Number Screening is one month.
- c. Customers subscribing to Originating Line Number Screening are responsible for all toll calls originating from their line which are not solely carried over the Telephone Company's facilities.
- d. This service is offered to residence and non-residence (business) individual lines, trunk lines and customer provided Public Telephones access lines such as COCOTs, Coinless and Inmate Service.
- e. If a call originates with the Telephone Company, but is not carried solely over the Telephone Company's facilities, the Telephone Company will send, with the ANI, the two digit code that identifies the call as being selectively screened. The Telephone Company assumes no liability for calls completed by any other entity or carrier, as long as the two digit code accompanies the ANI forwarded to the other entity or carrier. The Telephone Company is responsible for properly handling calls, which are selectively screened, and are not carried over any other carrier's network or facilities.

ZZ. NETWORK QUEUING (NetQSM)

1. GENERAL

NetQSM provides an alternative to a busy signal for multi-line hunt groups. When all lines in a multi-line hunt group are busy, new incoming calls are greeted with an announcement (the "lead announcement") and are then placed in queue. Additional announcements ("follow-up announcements") may be played periodically while the call remains in queue. As lines become available, those calls are released from queue and are terminated to the available lines.

When all available queue slots are full, the next incoming call receives a busy signal.

2. DEFINITIONS

Queue Slots - Allows incoming calls to be held in the order in which they are received when all lines are busy.

(N)

3. Definitions (Cont'd)

Custom Announcements - Allows customers to record and utilize their own announcements as a replacement for either or both standard announcements.

Trunk for Customer Provided Music - Allows customers to replace any silence which may occur while calls are in queue with music or other programmed material. Preparation of music or programmed material is the responsibility of the customer. The music or programmed material source will reside on the customer's premises. This feature includes the local loop between the customer's premises and the Telephone Company.

Music in Queue - Allows the customer to buy programmed music from the Telephone Company to be played to callers in queue.

3. REGULATIONS

- a. NetQSM is classified as nonresidence service and is available for subscription on all classes of nonresidence services including Centrex and ESSX.
- b. A standard lead announcement and a standard follow up announcement are provided by the Telephone Company and are included with the service. Customers may choose to purchase Custom Announcement(s) to replace either or both standard announcements.
- c. Customers may purchase any number of Queue Slots.
- d. Customers opting for Music in Queue must purchase it for all Queue Slots.
- e. NetQSM will only be offered where Telephone Company central office facilities permit and where it is technically feasible to permit.
- f. Customers are responsible for playback devices and all connections to the line terminations supplied on their premises. Customers are also responsible for all royalties and other payments associated with music or other programmed material on the Music in Queue Trunk.

BBB. NETWORK PROVIDED DIAGNOSTIC SERVICE

1. Network Provided Diagnostic Service is an optional network based monitoring testing and maintenance service designed to assist customers of regulated services (e.g. Prime Advantage) to identify and correct telecommunications problems that have been determined not to be in the Telephone Company network. The service does not require the Telephone Company to dispatch a repair technician to visit the customer's premises, but provides remote Telephone Company assistance. (N)
2. This service may be ordered by the customer or a vendor operating on behalf of the customer. The vendor must have a Letter of Authorization on file with the Telephone Company in order to place an order.
3. When a customer or vendor reports a problem to the Telephone Company, and the problem is found not to be in the Telephone Company's Network, the customer will be advised that the problem is not in the network. If after being advised the trouble is not in the network, the customer requests the Telephone Company technician provide remote monitoring, testing or maintenance assistance, the customer will be responsible for payment of billable charges for the period of time that the technician spends providing assistance to the customer. If the trouble is found to be in the network, the Telephone Company will make the appropriate repairs at no charge to the customer.
4. Network Provided Diagnostic Service charges also apply when a customer or vendor is not reporting trouble but is requesting remote Telephone Company assistance. In such case there is no free period for network testing to determine if the problem is in the network or at the customers premises.
5. The billable time for Network Provided Diagnostic Service initiated as a result of a request for repair service begins after the Telephone Company completes its normal intra-company testing to determine whether the trouble is in the Telephone Company's network or on the customer's side of the Demarcation Point. There is no billing if the customer chooses to end the contact after the normal intra-company testing is complete and no additional time is spent providing diagnostic services to the customer.
6. Network Provided Diagnostic Service charges apply only for the billable time the Telephone Company spends in diagnosing, monitoring or testing service to the customer without dispatching a technician. When the customer requests that the Telephone Company personnel be dispatched to make repairs, such service will be billed on the basis of time and material. (N)
